# Pallet Protection Labels

Pallet Protection Labels gives carriers, warehouse staff, and receiving teams clear, at-a-glance directives so that they can handle your shipment correctly through its transit. Whether you need to warn handlers not to break the stretch wrap, alert receiving staff to check the contents before accepting, or simply remind carriers that a load is fragile, these labels help prevent damage and costly miscommunication. Our Pallet Protection Labels are an **easy, affordable way to keep your pallets protected and your supply chain running smoothly**.
