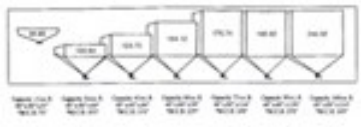
Peanut Dispensers



For businesses that go through a high volume of packing peanuts, scooping loose fill by hand is slow, messy, and wasteful. A packing peanut dispenser solves all three of these problems at once, **storing your loose fill in a contained unit and dispensing it consistently and without mess**. Available in six capacities ranging from 15 cu. ft. and 140 cu. ft., we have a size to match operations of all different. This one-time investment pays for itself quickly in time saved and loose fill waste reduced.
