Tag Wire & String

A tag is only as useful as its attachment. By using our tag wire or string, you can reliably secure shipping tags, sold tags, inspection tags, and hang tags to any product or package. Both options are pre-cut to a convenient 12" length, **keeping your tagging process fast and consistent**. Tag wire, made from 26 gauge wire, offers a secure, twist-to-close attachment that holds firmly even on heavier tags and high-traffic environments. Tag string, made from unpolished cotton, provides a softer, more traditional option that is suited for retail hang tags and merchandise labeling.
