

Vertical Roll Paper Cutters

Vertical roll paper cutters **make dispensing and cutting kraft paper rolls efficient** while saving space in your facility. Our cutter allows your staff to quickly tear the exact length of paper you need, streamlining packing and wrapping tasks in your busiest shipping areas. Because they're vertical, these paper cutters **take up minimal floor or counter space** compared to horizontal dispensers, meaning they're great for limited-space workstations. Built durably, our vertical paper cutters are a practical addition to any packing station that regularly uses packaging paper.
