Poly Bags

Plastic or poly bags are a popular, cost-effective solution for storage and packaging needs. They’re naturally lightweight and versatile, making them easy to handle and able to accommodate a wide variety of items. Additionally, plastic bags provide your products protection from dust and other environmental factors, keeping them safe and extending their shelf life. At Apple LTD, we have many different offerings of poly bags with different sizes, thicknesses, and properties such as moisture resistance and food-grade quality.
