

Cushioning

When it's time to relocate your business, protecting your equipment, inventory, and office assets during the move is just as important as the logistic of getting there. The right cushioning material keeps items secure and prevents damage that can occur from bumps and rough handling during transit. Our selection of cushioning materials includes newsprint and bubble wrap. **Newsprint is a clean, cost-effective wrapping material** that is best used for monitors, office equipment, merchandise, and everyday business items. **For more sensitive items like electronics or instruments, bubble wrap delivers dependable impact protection.**
