PVC Shrink Tubing

PVC shrink tubing gives businesses a flexible, cost-effective way to create custom-sized shrink packaging without the need for pre-made bags. **Pre-sealed on two sides, this tubing opens at both ends, allowing you to feed products through and seal each end to create a professional wrap**. The crystal clear, high-gloss finish showcases products while providing a secure, tamper-evident seal, making it the popular choice for manufacturers, distributors, and fulfillment operations. Available in a wide range of sizes, our PVC shrink tubing can meet your business needs.
