

IPG Exlfilm-Plus LTG Polyolefin Shrink Film

The "original" light gauge shrink film conforms to irregularly shaped objects and replaces 60 gauge polyolefin film. Excellent performance at a lighter gauge for substantial cost savings. Special formulation is 25% thinner than other shrink films on the market. Uniquely versatile film operates on all sealing and shrink equipment. Consistently strong seals over the broadest range of temperatures. Complies with FDA standards for direct food contact. Provides superior clarity and gloss for retail presentations.
